📍 Nice, France

## Summary

**Looking for a software engineer position.** Open to working remotely. IT passionate and young entrepreneur, I'm interested in taking up challenges in designing and developing innovative softwares within a team.

## Experiences

### **CEO, Botcrypto** - <https://botcrypto.io>

2017 - 2020

Co-founder Botcrypto SAS.

Design, Build and Run a software with a micro services architecture. 1k+ active users.

**Entrepreneurship - Crypto Trading - Python - Ruby on Rails - VueJS - µServices**

### **Lead Dev for Orange, Captero**

2018 - 2020

Design, Build and Run services to build the "Network as a Service" @ Orange.

**Agile - Python - Docker Swarm - CI/CD - Tests**

## Education

### **Engineering Degree, with honours. Télécom Physique Strasbourg**

2015 - 2018

Specialized in digital infrastructure and IoT. Highly qualifying degree in Network.

### **Master Degree. Strasbourg University**

2016 - 2018

Specialized in networks and embedded systems.

### **Mathematics & Physics preparatory classes. Camille Guérin, Poitiers**

2014 - 2016

Preparation for the competitive exams to get into an engineering school.

## Strengths

SOLID, OO and design patterns → clean architecture, clean code!

Full stack overview. Understand and share the DevOps philosophy.

Strong CI/CD experience : testing, code quality, packaging, auto-deploy.

Team player and professional. Experience with Agile frameworks.

I know how to argue my choices : what - how - why.

Knowledge sharing enthousiaste, **I'm doing open source.**

Coding during my time-off because it's a passion.

## Languages

**English** : good professional knowledge

**French** : native language

**Spanish** : basics
